Sustainable Development Goals (SDGs)

On 25 September 2015, the Head of Countries and High Representatives meeting at United Nations Headquarters in New York adopted the document titled **Transforming our world**, the 2030 Agenda for Sustainable Development adopting a new set of global Sustainable Development Goals which will transform the world in the next **15 years**. These are universal goals and targets which involve **193 developed and developing countries**. They are integrated and indivisible and balance the three dimensions of sustainable development viz., Economic, Social and Environmental.

The **17 goals with 169 targets** are covering a broad range of sustainable development issues. These included ending poverty and hunger, improving health and education, making cities more sustainable, combating climate change, and protecting oceans and forests.

The National Institution for Transforming India **NITI Aayog** being the Nodal institution at National level monitors the implementation of SDGs in the country apart from releasing SDG India Index – Ranking of States / UT in SDG. MoSPI being the SDG Data Focal Point of the Country coordinates the data related activities for SDGs global monitoring and also releases the SDG National Indicator Framework.

SDG India Index is being released by NITI Aayog every year which measures the progress at the national and sub-national levels towards meeting the Global Goals and Targets. The SDG Index is a powerful tool which offers excellent possibilities for the States/UTs to identify priority areas which demand action, facilitate peer learning, highlight data gaps, and promote healthy competition and the reports released till date are SDG Baseline Index 2018 - SDG 1.0, SDG India Index 2019-20 - SDG 2.0, SDG India Index 2020-21 - SDG 3.0.

The SDG India Index 1.0 released during December 2018 was based on 62 indicators covering 39 targets under 13 SDGs. The SDG India Index 2.0 released during December 2019 was based on 100 indicators covering 54 targets under 17 SDGs. The SDG India Index 3.0 released during 2020-2021 was based on 115 indicators covering 70 targets under 16 SDGs and the 17th Goal was taken just for Qualitative Assessment.

(Scores are given in brackets)

The **Multidimensional Poverty Index** facilitates formulation of sectoral policies and targeted interventions ensuring that “no one is left behind” through focused efforts on specific indicators and dimensions. Also, MPI **measures deprivations across Health, Education and Standard of Living**.

On identification of the multi-dimensionally poor individuals, the **Headcount Ratio** could be determined which is the proportion of multi-dimensionally poor individuals to the total population. The **Intensity of Poverty** is the average deprivation score of all multi-dimensionally poor individuals. The **MPI** is the product of Headcount Ratio and Intensity of Poverty. The MPI ranges from 0 to 1, and higher values imply higher multidimensional poverty.

Tamil Nadu Sustainable Development Goal (SDG) Factsheet published by the Department of Economics and Statistics depicts the current status of reform actions / indicators of State Indicator Framework in achieving the targets under Sustainable Developmental Goal. The Tamil Nadu SDG Factsheet also represents the progress of the State in SDGs and the indicators in need of focus in achieving the target.

The report for the year 2021 is available in the link [https://www.spc.tn.gov.in/PND_SDG reports/SDG_FACT_SHEET.pdf](https://www.spc.tn.gov.in/PND_SDG_reports/SDG_FACT_SHEET.pdf)

District Good Governance Index (DGGI) for the State of Tamil Nadu is structured on the Good Governance Index 2021 of Department of Administrative Reforms & Public Grievances and DGGI Framework of Government of Jammu & Kashmir 2021-22.

District Good Governance Index turns out to be a tool in bridging the data gaps as it triggers other stakeholders in addressing the existing data gaps using the indicators earmarked under various sectors. Apart from creating healthy competition amongst the districts, DGGI also supports evidence based policy making in the deprived areas directing focus on the development of the districts in the perspective of Sustainable Developmental Goals and consequently resulting in progress at State and subsequently at National level.

District Good Governance Index (DGGI) of Tamil Nadu is being estimated for the reference year 2020-2021, based on the 75 prioritized indicators under the District Indicator Framework covering 12 Goals under 10 sectors viz., Agriculture, Industry & Commerce, Human Resource Development, Public Health, Public Infrastructure & Utilities, Social Welfare & Development, Financial Inclusion, Judiciary & Public Safety, Environment and Citizen Centric Governance.

Report on District Good Governance Index of Tamil Nadu for the year 2021 will be released shortly.
